Northwind Foods N.V.

Annual Report 2025

Northwind Foods makes plant-based dairy alternatives in Europe and North America. This report covers the year from 1 January to 31 December 2025.

Message from the CEO

2025 was a year of steady growth. Revenue rose 7% to EUR 1.9 billion, and we opened our new oat-processing plant in Ghent. We also strengthened our commitments on climate, packaging and water, which you can read about on page 3.

Our people

People are at the heart of what we do. At the end of 2025 we had 5,340 employees, including part-time and seasonal staff.

Converted to full-time equivalents, our workforce at 31 December 2025 was 4,812 FTEs (2024: 4,650 FTEs). The increase mainly reflects the opening of the Ghent plant.

Region	FTEs 2025	FTEs 2024
Europe	3,105	2,980
North America	1,402	1,390
Head office	305	280
Total	**4,812**	**4,650**

Diversity and inclusion

Women held 34% of senior management roles in 2025. We aim to reach 40% women in senior management by 2027.

Sustainability targets

We have set ourselves clear, measurable targets. We will reach net zero Scope 1 and 2 greenhouse gas emissions by 2035, measured against our 2019 baseline.

By 2030, at least 50% of the plastic in our packaging will be recycled content. In 2025 the share was 31%.

Our plants use a lot of water. We will cut water use per litre of product by 20% by 2028, compared with 2022.

In 2024 we reached our target of buying 100% renewable electricity for all our sites, and we kept it in 2025.

We also strive to be a “good neighbour” in the communities around our plants – through volunteering, local sourcing and open days.

Target	Deadline	Baseline	Status 2025
Net zero Scope 1 and 2	2035	2019	–46%
50% recycled plastic in packaging	2030	–	31%
20% less water per litre	2028	2022	–9%
40% women in senior management	2027	–	34%

Financial highlights

EUR million	2025	2024
Revenue	1,912	1,787
Operating profit	214	196
Net profit	151	139

Outlook

For 2026 we expect revenue growth of 5–7%, driven by the full year of the Ghent plant and new products in North America.
